Gary,

On a side note I talked to Demita today about North Tank 7 and North Tank 8. Lonestar received the BTU values for each tank and we are looking at 3,000 for NT& and 1,000 for NT8. She called to tell me these weren't a candidate for Ashgrove which I agreed we all know that based on the BTU values. I asked her what Lonstar's availability was on this material since it should be primarily water. She was going to have to go back to the approvals group and discuss this with them again.

On a side note I emailed Carson at Veolia and asked him to give me the lean water specifications so we can see if North Tank 7 and 8 meet these requirements. Not that this is a great option but it's an option if we end up needing it. I have also been in contact with our commercial group and explained how important it was to get Lonestar and Veolia up and running. Clean Harbors promises to have something over to me soon on Tank 1 and 6.

Thanks,

Beth Crawford
